

INTRODUCING A SIMPLE WEB-BASED SYSTEM FOR EEO COMPLIANCE AND RECORD-KEEPING

Great news for broadcasters! Now there is a web portal that makes it simpler for you to comply with EEO regulations. It's EEO1Source, pioneered and developed in partnership by the Broadcasters Associations of California, Minnesota, Missouri and New Jersey.

This web-based program is easy-to-use and provides you with all the up-to-the-minute rules and forms you need to be in complete EEO compliance for your license renewal.

This secure new service is hacker-proof and password-protected. Here are some of the features of EEO1Source:

- Automatically sends your job opening information via fax to your Prong 1 and Prong 2 agencies
- Allows you to customize the send-to list for each specific opening
- Tracks other out-reach efforts such as on-air and print ads.
- Tracks the entire interview and hiring process along with referral sources
- Maintains a job specific file of all hiring processes
- Tracks your Prong 3 menu items
- Provides you with the opportunity for the required self-assessment in a verifiable way
- Allows you to generate "mock" reports in the proper FCC form to check your compliance with your counsel and/or corporate
- Generates all the required FCC reports in their proper form ready for you to copy on to FCC online forms
- Creates the necessary Public File reports for you
- Automatically creates the FCC-required web page
